

Congratulations to the scientists of Van Lang University for being honored world-top-cited scientists in 2023

Every year, the global research community pays great attention to the scientists marked world-top-cited scientists according to the Scopus database by Elsevier (the Netherlands). Scopus is one of the most reputable scientific databases in the world, alongside with the Web of Science database from the United States.

According to the publication on October 4, 2023 by Elsevier, Van Lang University (VLU) has 8 full-time scientists honored in the two lists based on the career-long achievement and the single-recent-year achievement. Among these, there are 07 scientists honored in the list of world-top-cited scientists for the single-recent-year achievement, and 3 scientists honored in the list of world-top-cited scientists for the career-long achievement. Especially, there are two scientists honored in the both lists.

Here is the original dataset from Elsevier for the single-recent-year achievement of 07 scientists from VLU
